

Chess Scholars

Develop your child's intellect through the royal game of chess! Current research shows a strong link between chess and academic performance in a variety of areas, including mathematics and language arts. Chess has also been proven to enhance children's motivation, concentration, focus, social skills, and creativity.

Each camp day consists of a fun, interactive teaching period and guided practice time. Both new and continuing Chess Scholars participants are welcome and will advance to the next level under the guidance of an experienced Chess Scholars coach. Participants are grouped with other children of similar chess skill level, and each first-time camper receives a free chess set to take home.
