Property Taxes-Park District	\$1,783	\$1,817	\$1,684	\$1,563	\$1,525

NOTES:

- Pursuant to state law, the Assessor reassesses property in one of three geographic regions in the County every three years (triennial assessment). In 2019, properties located in the northern suburbs will be reassessed. (In 2017, property in the south suburbs was subject to reassessment, while property in the city of Chicago was reassessed in 2018). If property values increase due to reassessment, this impacts the tax rate.
- When assessed values increase and a levy remains static, the tax rate will decrease. A tax bill is always a product of the amount of money sought from taxing districts (the levy), the property's assessed value, the state equalization factor, and the applicable tax rate.
- As property values in the north suburbs and central area of City of Chicago increase, the property tax burden is shifting away from the south area of the City of Chicago. Per the final extension information by the County, total EAV for properties in the northern suburbs decreased approximately 2.07%, and in Glencoe it decreased 3.98%.
- Suburban tax rates and amounts vary widely due to the large number of municipalities, school districts, park districts, and other taxing districts which provide different services at different levels of taxation.
